MEANS OF CONTROL

Raw material are supplied by Dupont China Holding Co., Ltd. Five samples are picked randomly before bulk material delivered into the stock, which are tested on mechanical properties based on GB/T 19975-2005 Standard in the factory laboratory. Then, the other five samples are picked randomly, which are tested on Azo, ph and other items based on EN420 in CE qualified laboratory. The raw materials are piled up respectively as QC passed material and untested material and with detail in-out storage recorders.

In production process, batch production is started until the first sample tested successfully. Quality Controller is engaged in inspection in production line in workshop. Five random semi-products should be tested in production line. Five random final-products should also be tested. All these testing are accomplished based on EN388 in the CE qualified laboratory.

The company trademarks and CE marks should be sewn strictly according to the specification requirement. Final products should be packed in polybag according to the packing instruction. Production equipments are proceed maintenance regularly. Fire, power and the other facilities meet the relevant national standard.
